

A black and white portrait of a middle-aged man with a shaved head, wearing a dark suit jacket over a light-colored button-down shirt. He is looking directly at the camera with a serious expression. The background is dark and out of focus.

Fabio Gomes

Tradition as innovation

Chinese wisdom for
contemporary challenges.

A black and white photograph of a map with a compass and pins. The map is spread out, and a compass is visible in the upper right corner. Several pins are placed on the map. The text is overlaid on the left side of the image.

You don't need more answers. Perhaps you need to ask better questions.

Situations are not always difficult to understand because they are complex.

More often than not, they remain misunderstood because we have learned to look at them in the same way.

Fabio Gomes's work is not about teaching protocols, techniques, or formulas.

It is about broadening the way leaders and teams interpret reality, enabling them to make more precise decisions in the face of uncertainty. Rather than simply conveying something new, the aim is to encourage a deeper exploration of what is already known.

Inspired by Chinese martial culture, exclusive, customized programs are developed to strengthen capabilities such as perception, anticipation, and adaptability in complex environments.

When these capabilities are developed, organizations become better prepared to protect people, preserve their reputation, reduce financial losses, minimize legal liabilities, and strengthen operational continuity.

Because the quality of our answers depends, above all, on how we learn to listen to the situation.

Activities are delivered through lectures, training sessions, workshops, and customized programs tailored to each organization's reality.

Why China?

Whether in the fields of Defense and Security or in the corporate sector, one question frequently arises:

Why China?

The answer is simple.

Just as Japan is widely recognized for its contribution to quality management, Germany for its excellence in engineering, and Israel for innovation in security and technology, China has developed, over millennia and through numerous wars, a sophisticated culture centered on understanding human relationships, adapting to circumstances, and making decisions in complex environments.

It was within this context that the Chinese martial system of Ving Tsun emerged, not merely in relation to combat, but as a means of refining perception, anticipation, adaptability, and strategic intelligence.

French anthropologist François Laplantine argues that contact with cultures very different from our own provides us with a necessary sense of estrangement. It is precisely because it encourages this estrangement that we become capable of perceiving aspects of our own culture that, because they are so familiar, often go unnoticed.

This is precisely the perspective offered by the Chinese martial tradition.

Therefore, rather than conveying something new, the aim is to encourage a deeper exploration of what is already known, both in theory and in practice.

International recognition

The principles applied in the development of leaders and teams have also drawn the interest of one of the world's most influential centers for special operations.

Fabio Gomes had an article published by **Joint Special Operations University (JSOU)**, the academic and thought leadership institution of the **United States Special Operations Command (USSOCOM)**, responsible for coordinating units such as Delta Force and SEAL Team Six.

Martial knowledge that extends beyond the obvious and addresses the demands of increasingly complex environments.

TESTIMONIALS

“Learning about strategic behavior and maintaining balance under pressure is essential for anyone who connects dreams and people every day. Thank you for sharing so much wisdom.”

- Official RIOgaleão Profile

RIO DE JANEIRO INTERNATIONAL AIRPORT

“It was excellent! Congratulations on the content and the way it was presented. Even within a limited timeframe, you managed to address the subject while also sparking the team’s curiosity.”

- Lucas Arloy

TV GLOBO

“It was an honor to take part in this experience. The content on anticipation and strategic awareness was extremely valuable. The Ving Tsun system offers a remarkably clear perspective on conflict management.”

- Fernanda Page

RIOSUL SHOPPING CENTER

Fabio Gomes was born in Rio de Janeiro and gained access to Chinese martial culture through the Ving Tsun strategic intelligence system, in which he was awarded the title of Senior Master by the International MYVT Federation (New York), under the mentorship of Grand Master Leo Imamura.

With nearly 30 years of experience, including work across the Americas, Europe, and Asia, he has built a career that has led him to serve as a guest instructor for Defense and Security organizations in Brazil. His contributions include training programs for police officers from BOPE/RJ (Tactical Actions Course), the Brazilian Army's Commandos and Special Forces (Commando Actions Course and Special Forces Course), the Brazilian Navy's Amphibious Commandos, as well as supporting the preparation of military personnel for United Nations peacekeeping missions.

He is the author of *The Art of Fighting Without Fighting: The Chinese Martial System of Ving Tsun in Brazilian Army Special Operations* and has published articles in international journals and specialist publications, including the Brazilian Army's *Military Doctrine Review* and the journal of the International Law Enforcement Educators and Trainers Association (ILEETA).

He also had an article published by Joint Special Operations University (JSOU), the academic and strategic thought institution of the United States Special Operations Command (USSOCOM), the command responsible for coordinating the world's most prominent special operations units.

Drawing on this expertise, his work also extends into the corporate sector, where he helps leaders and teams manage risks and make decisions under pressure.
